

AGILE

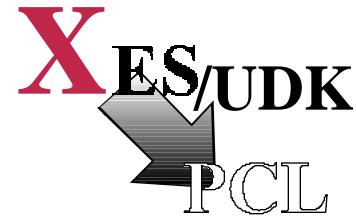

SALES

- ▲ Enable sales in legacy applications and unique environments
- ▲ Replace older printers (2700,3700,4011,4030,4045,4197,4213,4235,4700)
- ▲ Solve customer problems with new or old connectivity hardware and software products
- ▲ Provide effective pre-sale and post-sale support and training to sales and technical personnel

TECHNICAL

- ▲ Experienced and helpful technical support staff
- ▲ Connectivity and data stream translation
- ▲ Legacy printer applications
- ▲ IBM mainframe and midrange applications and printers

- | | |

HISTORY

- ▲ Solving problems and enabling sales of Xerox printers for more than twenty years
- ▲ Over sixty thousand **AGILE** products installed worldwide
- ▲ Proven commitment and ability

INTERNAL ADAPTERS FOR XEROX PRINTERS

X/LT™ II

Internal IBM 3270 Printer Interface & XES to PCL Translator for Xerox Printers

Features:

- ▲ Supports edge-to-edge printing
- ▲ 512K FLASH for fonts, forms, and configuration storage
- ▲ 3270 coax interface and parallel input port
- ▲ Optional FLASH for additional font and form storage

Internal IBM 3270 interface with optional XES/UDK to PCL translation for XEROX DocuPrint N-series printers (N2025, N2125/2125b, N2825, N3225, N4025) and the N17, N24, N32 and N40 network laser printers.

X/TRA™ XLi II

Internal XES to PCL Translator for Xerox Printers

Features:

- ▲ High density DB-26 parallel interface
- ▲ PC based software for configuration and diagnostics
- ▲ Optional FLASH for additional font and form storage

Internal parallel interface XES/UDK to PCL translator for XEROX DocuPrint N-series printers (N2025, N2125/2125b, N2825, N3225, N4024) and the N17, N24, N32 and N40 network laser printers.

EXTERNAL 3270 CONNECTIVITY

6287 **ULTRA II**

Printer Interface Controller for IBM 3270 Mainframe Systems

Features:

- ▲ 21 user-programmable function strings
- ▲ Programmable FLASH memory for font, form, and customization for special applications
- ▲ Parallel output
- ▲ Optional XES/UDK to PCL5 conversion

Single-port multi-protocol converter providing one-to-one connectivity for parallel attached distributed printers to IBM 3270 networks and supports additional parallel host input. May be optionally configured for XES to PCL support for legacy XES printer replacement.

6287ALLY and **ALLY PLUS**

Printer Interface Controller for IBM 3270 Mainframe Systems

Features:

- ▲ User-programmable function strings
- ▲ Removable external ROM cartridge for upgrades, customization or special applications
- ▲ Parallel or serial output (ALLY and ALLY PLUS)
- ▲ Parallel and serial alternate host support and output (ALLY PLUS only)

Multi-protocol converter providing one-to-one connectivity for parallel or serial-attached distributed printers to IBM 3270 networks. ALLY PLUS includes alternate host capability for printer sharing.

EXTERNAL XES TO PCL TRANSLATION

X/TRA™

XES to PCL Translator for Parallel-Attached Laser Printers

Features:

- ▲ Switch operational modes with the push of a button
- ▲ Includes powerful PC based software for configuration and diagnostics
- ▲ Custom configuration support

External parallel in/parallel out stand-alone XES to PCL translator that attaches to the standard parallel port of virtually any PCL5 printer.

EXTERNAL 5250 CONNECTIVITY

5250 **ALLY**

Printer Interface Controller for 3x/AS400 Midrange Systems

Features:

- ▲ Connects to any ASCII or EBCDIC output device
- ▲ Automatic printer sharing between 3x/AS400 host and parallel alternate host input port
- ▲ Forms, vector and raster graphics support

Single-port multi-protocol converter providing one-to-one connectivity for parallel attached distributed printers to IBM 5250 Twinax networks in S3x/AS400 environments.

5250 **OPTIMA**

Printer Interface Controller for 3x/AS400 Midrange Systems

Features:

- ▲ Parallel and serial alternate host input and printer output
- ▲ Supports up to three twinax sessions, each with selectable printer emulation
- ▲ Automatic printer sharing between 3x/AS400 host and alternate host parallel port

Multiple-port multi-protocol converter providing connectivity for up to three parallel or serial attached distributed printers to IBM 5250 Twinax networks in S3x/AS400 environments, includes modifiable translate tables and PC based, menu driven configuration program.
